

**AQUATIC
LAB** SESSIONS VOL. 1

Title: Aquatic Lab Sessions Vol. 1

Artists: Various

Label: Aquatic Lab Records

Release date: Mid July 2009

Distributed exclusively by S.T. Holdings

Aquatic Lab Sessions Vol 1

Aquatic Lab Sessions Vol 1 is a diverse package consisting of a selection of **Aquatic Lab's** vinyl catalogue combined with previously unreleased material.

The compilation is constructed to be a collection of flowing styles, capturing everything from deep atmospheric textures to some serious sub rocking big rig material. The CD album features debut Aquatic Lab release by **Caspa & Rusko** 'King George', 'Colditz' by UK Garage legend **Zed Bias**, 'Nah Go Dung Deh' by grime/dubstep star **Cotti** and 'The Darkness' & 'Dark Passenger' by acclaimed producer **Seven**.

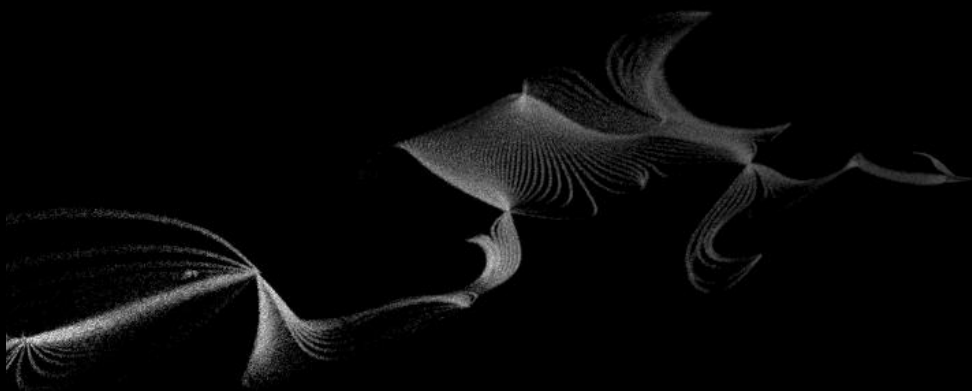

First up is a chilling future-scape progression titled 'Ankoku Butoh' by **Moving Ninja**; an organic journey that is unique in every possible way. Further on, the album showcases a wealth of underground sounds from the purist hard stepper 'Wasps' by **P-Vans**, to the dub inspired rhythmic 2-Step roller 'Hollandia', produced by **Spherix**. New York based Australian producer **Flash** brings forth a hollowed out 4/4 dread bass long player in the form of 'Right Here' and **Kila Mega Giga Tera**, a live group consisting of **Distro & Dub FX**, deliver a kick-stepping, hard skanking piece of kit entitled 'Subsonic'. **Vista** comes with a sub shaking hybrid of moody minimalism in the shape of Neptune, and to round off the installment, bass scientist **Twitch** culminates the release with an original piece of wobble bass that is brimming with character and primed for the dance floor.

About Aquatic Lab Records

The Aquatic Lab was established in 2006 by the pioneers of the Australian dubstep and garage movement, DJs **Farj** and **Paul Fraser**. From the onset, Farj & Paul set out to create a unique proposition – a quality record label managed from Australia but with a global vision from day one. Currently focused on the broad and emerging sounds called dubstep, Aquatic Lab as the name suggests is an experimental environment for tomorrow's big name artists.

Aquatic Lab Records is manufactured and distributed through **ST Holdings**.

The CD album is complimented with a limited edition triple vinyl pack consisting of six previously unissued tracks.
